HARDY UPLAND TREES
GROWN BY
Maloney Bros. & Wells Co.
Dansville's Pioneer Wholesale Nurseries
THIRTY-SECOND YEAR
Dansville, N. Y.
Deal Direct the Catalogue Way
With the Largest Nurseries in New York State

Year after year we take greater pride and pleasure in sending our friends the latest issue of the MALONEY CATALOGUE. To the thousands who have dealt with us it must add confidence in our ability to give them better service with each succeeding year’s experience.

As we enter this new season we wish to extend our thanks and appreciation to all our customers for their patronage and to promise a personal service in handling your future orders which will merit your continuing to deal with us season after season.

Dealing direct the CATALOGUE WAY is a very simple, commonsense, business-like way of buying nursery stock. First you select just what you want (not what you are talked into buying.) Then you order direct from the man who has grown the trees, dug them and who packs them. You have the positive guarantee of the largest nurseries in New York State that you are getting just what you order. And finally when you pay for your trees, you do not pay any profits to the MIDDLEMAN which means that you save at least fifty cents on every dollar invested.

We have no axe to grind with the middleman; he is necessary in many lines of business, but as far as nursery stock selling is concerned the catalogue way is the most modern, up-to-date, economical and efficient method of selling. It is the only way the planter can get the best value for every dollar he spends and at the same time have the guarantee of the man who grows (the only man who KNOWS) that the stock is what he orders.

It is our hope when sending you this catalogue that if you are not already a MALONEY CUSTOMER, you will favor us with an order this spring so that we may convince you of the value of MALONEY QUALITY PLUS MALONEY PERSONAL SERVICE.

Maloney Trees Bear Early and Produce Fruit of Superior Quality
Fall Planting

Fall Planting is no more an experiment, for thousands of trees and plants are now being set by the largest and most successful orchardists, who maintain that trees and plants set in the fall give decidedly better results. Various Experimental Stations have published statistics showing results of a certain number of Apple Trees planted in the fall, and a like number set in the spring, where the percentage of loss is considerably less on the fall set trees.

Years ago people erred in planting too early in the fall, they insisted on the nurserymen shipping the middle of September which is three weeks before the trees are fully matured or ripened. We start shipping between the 10th, and 15th, of October at which time trees are thoroughly hardened and in excellent condition for planting.

The trees planted in the fall have a chance to get firmly established in their new locality, by the winter snow and spring showers settling the earth around them, and when spring opens your trees are ready to start with vegetation. With this early start and vigorous growth they are better able to withstand the mid-summer drought. You can readily see that trees planted at this time derive full benefit of the spring showers.

Won't you agree with us that sometimes with a backward spring it is necessary on account of rainy weather, etc. to defer planting until the last of April or the first of May before you can get on the land to plant? Should the planting be followed by dry weather as only too frequently occurs your percentage of loss is heavy.

If you have never done any fall planting try it this season; you will be surprised at the growth your trees will make the first year.

Advice to Planters

Preparation of the Soil—Prepare a rich deep bed of mellow soil, and have the land sufficiently drained to relieve the roots from standing water. For best results the land should be in as good condition as is required for a crop of wheat, corn or potatoes.

On new, fresh land, manuring will be unnecessary, but on land more or less run down, fertilizers must be applied either by turning under heavy crops of clover, or well decomposed manure. Such preparation of the soil will furnish a nourishment which is absolutely necessary to insure success.

Pruning the Tree—Remove all bruised roots with a smooth slicing cut, no trimming of tops to be done in the fall, but in early spring you can round up branches as they ought to be to develop a well balanced head.

Planting—Make the holes large enough to admit the roots without cramping or bending and deep enough to set the trees to their natural depth. Fine surface soil should be used for covering the roots and this should be carefully worked among them. If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots, so that there will be no opportunity for dry air or frost to enter and deprive the roots of the full benefit of their natural protection. Omission to pack the earth solidly is the most frequent cause of failure in planting nursery stock. We cannot too firmly impress upon you the importance of packing the earth firmly around the roots. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Always remove the labels when planting. If these are left until the trees are grown, the connecting wire often cuts into and destroys the tree or branch to which it is attached. Never use manure in contact with roots. When planting dwarf trees, set them low enough to cover the stock upon which they are budded.

After-Culture—Grass should not be allowed to grow about your trees or plants. The ground should be cultivated for a space of at least a foot outside the roots. This should be done every 10 days the first year during May, June and July. If the ground is poor it should be enriched with surface applications of manure.

We Are Responsible

THIRTY-TWO YEARS have been spent in building up our nursery business, and each succeeding year has shown a steady, conservative growth and found us better able to satisfy the requirements of every customer. 1916 finds us with better equipment to serve you than ever.

WE OWN over 400 acres of nursery and grow our trees 1500 feet above sea level so they are hardy, healthy, and vigorous. We cut our own scions for budding from trees of known merit, so that our trees are not only true to name but have superior fruiting habits.

WE HAVE BEEN ADVERTISING in the Rural New Yorker, Country Gentleman, Farm Journal and other periodicals for years. These papers guarantee their advertising to their readers. If we had not "delivered the goods" to these readers, these papers would not continue to publish our advertising.

This Is Our Binding Guarantee

It Proves That We Recognize and Accept Our Responsibility to the Fruit Grower.

WE GUARANTEE all trees and plants purchased from us to be true to name. If any stock does not prove true to name and as represented by us, we will make good your loss or damage any time within ten years after date of purchase. If for any reason, we cannot agree on adjustment, we are each to appoint an arbiter who shall choose a third party and we shall accept the award of the majority as binding on us. We guarantee our stock to reach our customers in good growing condition, and to be free from San Jose scale, Peach "Yellows" or other injurious pest or pests. Our guaranty means something to you, for it is backed by a firm with a capital of $60,000.00 and an established national reputation extending over thirty years. If any mistake occurs on our part in regard to stock shipped to you, tell us about it. (It is up to you to be satisfied.)

Our Shipping Season usually opens here about the 10th of October and continues until cold weather.

Order Early. As our orders are shipped in the rotation they are received, and as we cannot delay orders received first for orders coming later on, we advise the placing of orders early.

5% discount on all cash orders amounting to $4.00 and up received before October 15th. 3% after that date.

Rates: 50 trees at hundred rate providing there are not less than ten of any one variety.

Guide for Amateur Fruit Growers
This is an excellent book for anyone who has not made a study of fruit growing and wishes to be informed how to grow fruit successfully. This book deals with only common practices and simple methods adopted by practical planters. A splendid book for the amateur.

Price 25c. postpaid.

**PARCEL POST.** First class 3 foot trees sent by parcel post, postage prepaid, for 15 cents each, $1.30 per 10.  
5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% after that date.

**For the convenience of our customers,** we have printed in heavy type the names of the best and most profitable varieties.

**Apple Orchard a Safe Investment.** Statistics show that there is no better investment than in an orchard of the *king of fruits, the apple*, for, after the fifth or sixth year, it requires but little attention and you have an annual income that insures you an easy living for the remainder of your days.

**Soil and Climatic Conditions.** Apple trees will do well on most any kind of soil, and under the most severe climatic conditions. However, your success depends on the care given, cultivation and spraying at the proper time being most essential.

---

**Oakwood Heights, N. Y., Apr. 26, 1915**

Maloney Bros. & Wells Co., Dansville N. Y.

Gentlemen:—

Goods received and I was very much pleased with them, both with the quality and the way you packed and shipped them. I will certainly be a booster for you in the future.

Very truly yours,

E. G. Fisher

---

**Newport, Pa., June 1, 1915**

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen: I wish to thank you for the prompt shipment and the great care you took in preparing the last trees I got. In two weeks after they were planted, every tree was full of leaves and they were the finest stock we ever received from you. The first ones were fine, but these are much better. We now have about 800 of your trees planted and will still plant more.

Very truly yours,

J. H. Emery
Yellow Transparent. Medium size, roundish, oblate, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

Autumn Varieties

Alexander. Of Russian origin. Large, deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

Autumn Strawberry. Medium, streaked, tender, juicy, fine, vigorous and productive. September to October.

Duchess of Oldenburg. Summer. Medium size; red striped; flesh white, juicy and excellent flavored. Trees are natural dwarf growers and make fine fillers; require small root and branch space. Crops nearly always large. One of the important varieties for all sections north of Mason and Dixon line. Thrives and yields well of high-grade fruit at all elevations in Pennsylvania, New York, Ohio and other northern states. Trees among the hardiest and one of the few that will stand the climate of Iowa, Minnesota, Montana, and other cold locations. You can depend on Duchess to yield Apples you can sell for good prices. August and September.

Fall Pippin. Very large, yellow, tender, juicy, and rich. Fine in all localities; tree vigorous. September and October.

Gravenstein. An attractive and excellent quality apple. Fruit large and uniform in size, skin thin, tender, greenish yellow overlaid with dark red. September to November.

Maiden's Blush. Large, flat; pale yellow with a red cheek; beautiful; tender and pleasant, but not high flavored. Tree an erect grower, and a good bearer. A valuable market apple. September and October.

Pound Sweet. A very large, round, yellow russett apple, very sweet and rich. Tree a vigorous, red, upright grower; valuable. October and November.

Pumpkin Sweet. Very large; yellowish russet, sweet and rich. Valuable. October and November.

Evolution of the Apple

Apples are new in the economy of the world's use and taste. At the beginning of the last century few varieties were known, and we can go back in history to a time when all apples were little, sour and puckery—crab apples and nothing else. The crab apple was and is in its wildness nothing but a rosebush. Away back in time the wild rose, with its pretty blossoms that turn to little red balls, apple flavored, and the thorny crab had the same grandmother.
Winter Varieties

American Blush. (High Quality Red Winter Apple). Here is an apple that is not surpassed in the world over for large size, great beauty of color, or for excellent quality. Fruit large, roundish; color bright red on yellow skin; flesh yellow with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. November to January.

Baldwin. This is the leading commercial variety in the American markets. It is to apples what Elberta is to peaches and Montmorency is to cherries. One of the best storage apples for export trade. Thousands of barrels of this fruit are exported to England annually. Baldwin is planted extensively and succeeds wonderfully well in all states east of the Mississippi. No variety yields larger crops, bears shipment better or is more attractive in colors size and shape. It is highly esteemed for an eating and cooking apple. Fruit large, bright red, crisp, juicy and rich. Trees vigorous, upright and productive. For a commercial orchard, it can be relied upon. If ever in doubt what kind of apples to plant, select Baldwin. It should be in every orchard. December to March.

Bellefower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. October to February.

Boiken. Annual bearer, vigorous grower. Fair size, hardy; bears young, very attractive and regarded as one of the most valuable apples of recent introductions. November to March.

Ben Davis. is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities. The fruit is thick-skinned, does not show bruises easily, and presents a good appearance in the package after being handled and shipped in the ordinary way. November to April.

Delicious. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting; juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardiest. November to April.

HEAVY CROP OF BALDWIN

Baldwin is a sure and heavy yielder, succeeds over a wider range of territory than any other variety. 50 trees in a Pennsylvania orchard produced 684 bushels which sold for a net profit of $524.60.
Fameuse. (Snow Apple). Medium size; deep crimson; flesh snowy white, melting and delicious, one of the finest dessert fruits and valuable for market; a good baking apple. This variety succeeds over a very wide range of territory; tree hardy and vigorous; an annual cropper. October to December.

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. December to March.

Giliflower. (Black.) An old dessert apple; tree a good vigorous grower and a reliable cropper. October to February.

Grimes' Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Tree is very hardy and productive, and one of the best fillers, as it comes into bearing very early. Blossoms come late in the spring; frost seldom catches them. A quality Apple in every way, a quality orchard tree in growth, health and all characteristics, Grimes Golden is one of our few best sorts. December to April.

Hubbardston Nonesuch. Large, striped yellow and red; flesh yellow, juicy and tender, with an agreeable flavor of acidity and sweetness; of the finest quality and very valuable; strong grower, bears well every year; comes into bearing early. You will find it a splendid orchard tree for New York and Pennsylvania. November to March.

Jacob's Sweet. Large, yellow with red cheek. Excellent quality and good keeper. December to January.

Jonathan. A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Will keep well without special care and also stand much handling. November to January.

King. (King of Tompkins Co.) When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. November to January.

Mammoth Black Twig. Resembles a large Winesap. Dark red. A very profitable variety to plant for market. It is productive and a long keeper. If a late winter apple is desired you will make no mistake in adding it to your list. December to April.

McIntosh Red. An exceedingly valuable, hardy, attractive apple; good size; nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bearer—comes into fruiting early, yielding large crops. Mr. Maloney recommends this variety to our patrons as one of the best used as a filler. The hardness of both tree and fruit and its great early bearing qualities, coupled with its elegant color and splendid flavor, makes it a most valuable apple. Do not overlook McIntosh when selecting varieties for commercial orchard planting; has no superior as an early winter apple. October to January.

Newtown Pippin. Medium to large; yellow delicious flavor; a long keeper. Known throughout Virginia as Alhemarle Pippin. November to May.

Northwestern Greening. A round, large, attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality. October to April.
Northern Spy. A hardy, large, red, winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong grower, rugged. Blooms early, escapes frosts. Slow coming into bearing, which is the only thing that keeps the Northern Spy from ranking with the most important commercial varieties. Its large size, handsome appearance and superfine quality give it first rank for fancy trade, and when well grown and properly packed, it sells for higher prices than any other winter apple. It retains its crispness and high flavor well to the end of its season. Dec. to Mar.

Rhode Island Greening. This apple has a recognized standing, both in domestic and foreign markets and sells readily for good prices. It is regarded as the very best cooking apple grown and also excellent for dessert use. Size large. Flesh yellowish, firm, fine grained, crisp, tender, juicy, sprightly subacid; very good. Skin grass-green to yellow, sometimes with brownish-red blush. Tree large, strong, vigorous, wide spreading. Ripe in December, keeps until April.

Rome Beauty. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit. Good grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York, West Virginia and Maryland, will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure-bearing, make it a favorite with the grower. Fine quality for use and for handling make it popular with consumers and dealers. Dec. to Mar.

Smokehouse. Fruit medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red; sometimes deepening to a solid bright red. Oct. to Mar.

Spitzenburg. (Esopus.) Unequalled for its rich high flavor, color deep red; flesh yellow, crisp, rich and excellent. Dec. to Mar.

Stayman’s Winesap. Medium to large, attractive; green and yellow, almost hidden by dark red stripes; flesh yellow not in the least mealy; plenty of juice; quality the finest. Tree a quick and large grower, bears young, often producing a barrel to a tree when five years old. Bears every year, crops uniformly heavy. Stayman’s Winesap is now planted in nearly all new orchards in the East, to a large extent. You cannot find a better sort, either for bearing habit, size of fruit, looks or quality. Except at the highest elevations, it is almost always our most desirable apple for east of the Mississippi. Do not hesitate to plant Stayman’s Winesap. Dec. to Apr.

Sutton Beauty. Tree vigorous, upright, spreading, fruit uniform in size and shape, fine grained, crisp, tender, very good. Color bright red striped with carmine. Nov. to Mar.

Tolman Sweet. Medium size; color, light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. This is the old favorite, highly prized for baking, etc. Productive, an early bearer, long keeper. Nov. to Apr.

Packed to Arrive in Good Condition

Swanton, O., May 4, 1914.
Maloney Bros. & Wells Co.,
Dansville, N. Y.

Dear Sirs:—The trees that you sent me were received in fine order and planted at once. I find them all alive and growing nicely. They are as nice a set of trees as I have ever seen, and you can count on a larger order from me next spring.

Thanking you for your fair treatment, I beg to remain,

Yours truly,

ALBERT E. STOYLE.

THE MODERN WAY OF SORTING AND PACKING APPLES
Wagener. (Red Winter Apple) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Of medium to large size; flesh firm, sub-acid and fine quality. Dec. to May.

Wealthy Apple. A patron writes that from 450 Wealthy apple trees five years planted, he sold $600.00 worth of fruit, some trees yielding a barrel of apples. From one tree four years old he picked three bushels of apples. Wealthy is one of the best red early winter apples. Owing to its early bearing qualities it is planted largely as a filler. Its extreme hardiness makes it a valuable variety for the Eastern States and is considered to be one of the best all around early winter apples to grow. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This variety is particularly valuable for cold climates because the tree is very hardy. Wealthy is being planted largely for commercial purposes as a filler in many sections. Oct. to Jan.

Winesap. Large, roundish, oblong; deep red color, with a few streaks and a little yellow ground appearing on the shady side; flesh yellow, firm, crisp, with a rich, high flavor; quality very good, and highly esteemed in the South and Southwest. Dec. to May.

Winter Banana. Fruit large size, perfectly in form; golden yellow, and beautifully shaded and marbled with bright, crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. Very popular especially in New York and Pennsylvania. Nov. to Jan.

Wolf River. Fruit is very large, some specimens weighing 27 ounces; flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

York Imperial. A fine, hardy, large, red, winter apple; succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Splendid variety for Pennsylvania. Nov. to Feb.

Best Hardy Crab Apples

General Grant. Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained. Sept.

Hyslop. Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; and popular as an account of its large size, beauty and hardness. Oct.

Transcendent. This is probably one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The fruit of this crab is held in great esteem by housewives for making jelly. Fruit, bright yellow, striped with red. Sept. to Oct.

We cut our own scions for budding from bearing trees of superior fruiting habits.

Kieffer Pears are $5.00 per 100 less than other varieties. This applies to 100 rate only.

PARCEL POST. First class 3 ft. Pear Trees can be sent by parcel post, postage prepaid, for fifteen cents each; $1.30 per 10.

5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% discount after that date.

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

The Planting of Pears is on the increase, so much so that it has been difficult for us to supply the demand. This is especially true of Bartlett, Clapp's, Kieffer and Seckel which are the leaders and in the order as named.

Succession of Varieties. By judicious selection of varieties, a constant succession can be obtained so that you will have pears continuously from July to early Spring.

Soil. Pears will succeed best in a clayey soil, although any good heavy soil will do, but avoid planting on sandy loam.

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored, a most delicious fruit; tree bears early and abundantly. We have sold many large orchards of this variety. The fruit ripens just at a time when there is but little competition; in fact, there is no pear ripening at the same time that is in the Bartlett class. It might surprise you to know—nevertheless it is a fact—that there are more of this variety planted than all other kinds of pears combined. That speaks for itself, does it not? You will never make a mistake when planting Bartlett. Sept.

Beurre D'Anjou. This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Beurre Bosc. A large and beautiful russet pear, very distinct with a long neck; melting or nearly so, high flavored and delicious, bears well. Oct.

Springton, Pa., May 15, 1915.

Maloney Bros. & Wells Co., Dansville, N. Y.

Gentlemen:—The trees arrived all O. K. I have been a planter of trees and shrubs for the past twenty years, and never bought a better lot of trees for the price I paid you.

Respectfully yours,

F. P. Miller.
Clapp's Favorite. This is without doubt the most productive Pear on the market. A superb large, long yellow Pear, richly flushed, with russet red next the skin. The flesh is fine grained, juicy, melting and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling Flemish Beauty in growth. It is as hardy as the Flemish Beauty; a fine grower and extremely productive. Our trees of this variety are exceptionally fine, for they were grown on our new farm, situated at an elevation of 1500 feet, which insures you of receiving hardy, healthy and vigorous trees, from which you are bound to get the best possible results. Early Aug.

Duchess D' Angouleme. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Flemish Beauty. This fine old Pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Considered one of the hardiest and best for the northwest in which location it bears great crops of perfect fruit. Sept. and Oct.

Garber. One of the Japan Hybrids; larger than Kieffer; hardy, productive, early bearer; excellent for canning. September and October.

Howell. Large, yellow, with red cheek; early bearer and productive. September and October.

Kieffer. Large, rich golden yellow, sometimes tinted red on the sun-exposed side; fair quality, excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until leaves begin to fall, then gather carefully and allow to ripen in a cool dark cellar, or other place of even temperature. Tree a most vigorous grower, an early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country. The tree is so hardy and free from insect pests as to give it greater value than most other varieties. The fruit is of high color and great beauty and sells more readily than fruits of better quality. Oct. to Nov.

Koonce. A very popular early variety. Fruit large, yellow, one-half nearly covered with red. Does not rot at the core. Tree vigorous, hardy and upright grower. Very productive and a good shipper. July.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

Sheldon. A large, round, russet and red pear of very fine quality, melting, rich and delicious. Tree vigorous, erect and handsome, bears well and should be more largely planted. Oct.

Seckel. A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known. Sept. and Oct.

Vermont Beauty. One which should not be overlooked when picking out the different kinds you want to set. The tree originated in Northern Vermont and is very hardy and thrifty. October and November.

Wilder. One of the very earliest pears, attractively colored and of excellent quality. The tree bears good crops early and annually. Early August.

---

Come to Dansville, our guest, and look over our 400 acres of nursery which is the result of 32 years experience. You will find just what you want.

Fifty at hundred rate providing not less than 10 of any one variety

**PARCEL POST.** First class 3 foot trees sent by parcel post, postage prepaid, for 20 cents each, $1.50 per 10
5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% discount after that date.

**For the convenience of our customers,** we have printed in heavy type the names of the best and most profitable varieties.

**That the planting of cherry trees in the past has been neglected is a fact.** There is as
big a demand as ever for cherry fruit—the supply does not begin to satisfy more than one-half
of the demand. Canneries are being started wherever there are good cherry orchards. It is
easy to dispose of your fruit, and it is one of the most profitable fruits under cultivation.
Enormous profits are being realized from young orchards, for they come into bearing at an
early age and yield abundantly.

**Requires Least Attention of all Fruits,** because it has been demonstrated beyond question of
doubt that scale cannot live on cherry.

**Where to Plant**—on any kind of land, other than wet. They will thrive beautifully on a sandy
or gravelly soil.

**How to Plant**—For your information cherry roots must not be given much sun or wind ex-
posure—either are just as harmful as a heavy frost. You would not think of leaving them out
over night uncovered. It is just exactly as necessary to protect them from sun and wind.
Sour Cherries

Baldwin. Fruit very large, almost round, dark red, slightly sub-acid, the sweetest and richest of the Morello type. Remarkable for earliness, quality, vigor, hardiness and productiveness. June.

Dyehouse. A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies and especially for canning it has no superiors among cherries. Early June.

Early Richmond. This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Fruit is medium size, round and dark red. The flesh tender, juicy, and sub-acid. Ripens in June.

English Morello. Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Louis Phillippe. Large and beautiful fruit of blackish red, flesh tender, mildly acid, good to best. Mid-July.

May Duke. Large, red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

Montmorency. A beautiful, large, red cherry; much larger and firmer than Early Richmond, and fully ten days later in ripening. Being extraordinarily prolific and very hardy, it can be recommended as a variety of great value. Valuable for canning and preserving. A patron writes that six years ago he planted fifty Montmorency cherry trees from which he has just harvested $150 worth of fruit. One acre of Montmorency cherries, owned by a neighbor, has returned an average annuity of over $600 for the last ten years. This cherry is in great favor wherever cherries are grown. With such a heavy demand for this variety, we would suggest that you order early. Last of June.

Olivet. A new Duke of French origin. Unlike most others of this class, it is said to be very early and to ripen over a long period. Fruit very large. June.

Ostheim. A hardy Cherry from Russia. It has been tested in the severest winters of Minnesota, and has been found perfectly hardy. Fruit large. July 15th.

Vladimir. Hardy, strong grower, very productive, sub-acid, of excellent quality, juicy. July 15.

Wragg. Much like English Morello. More productive and excels in size, yield and quality. One of the hardiest Cherries and has produced annual crops at the northern-most limit of Cherry culture. Aug.

REPEATED ORDERS MAKE OUR SUCCESS

Maloney Bros. & Wells Co.
Dansville, N. Y.

Gentlemen:
I have received the trees all O.
K. Thanks for sending such strong,
healthy, vigorous and extra trees.
I will need some more in the near
future. Respectfully yours,
HENRY STEINHAUSER.
Dikeman. Fruit large, black, firm, of excellent quality, fine keeper and shipper. Early Aug.

Governor Wood. One of the best cherries; very large, light yellow, marbled with red; juicy, rich and delicious; tree healthy and a great bearer; hangs well on the trees; vigorous. Last of June.

Lambert. A fine sweet variety originating in Oregon, and one of the largest of all Cherries, dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet Cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

Napoleon. Tree medium size, erect with roundish head, fruit borne generally in twos; very large oblong cordate, light lemon yellow with red cheeks in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripe about June 20th.

Schmidt’s Biggarreau. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender; very juicy with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market. July.

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow, with red cheeks; firm, juicy and excellent, one of the best light-colored Cherries; vigorous and productive. Last of June.

Fifty at hundred rate providing not less than 10 of any one variety.

**PLUM ON PEACH.** We have a nice assortment of Plum budded on Peach Seedlings which we will sell for 5c per tree less than above prices.

**PARCEL POST.** First class small size 3 ft. trees can be sent by parcel post, postage prepaid, for 20 cents each, $1.75 per 10.

5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% discount after that date.

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

The plum has not been planted as extensively as it deserves, and the lack of planting has doubtless been partly due to difficulty in marketing; but with the demand for good fruit in our eastern markets almost unlimited, and the establishment of canneries in most important fruit sections, it is again being planted in large quantities, as it is known that a little care and attention at the proper time will insure a profitable crop.

**Soil.** The best soil for Plums is a loose, deep gravelly loam, with an open sub-soil, such as is suited for potatoes, although any soil may be used, provided it is well drained. For planting distance, see page 6.

**We Pack the Way Southern Growers Prefer**

Maloney Bros. & Wells Co., Dansville, N.Y.

Gentlemen:—The trees and etc. came today in good condition.

Very truly yours,

S. W. SHAVER.

Maloney Bros. & Wells Co., Dansville, N.Y.

Gentlemen:—The 900 trees arrived today in excellent condition. Please accept my thanks for your prompt shipment and splendid stock.

Yours respectfully,

JESSE G. VANSCOY.

Maloney Prune. We are offering it this year at same prices as other varieties. One of the best prunes on the market, for it has the quality of a Fellemburg, size of York State Prune, surpassing both for its long season, extending from September 15th until freezing weather. Color dark blue; flesh yellow and delicious; freestone; heavy annual bearer. It certainly is a marvel—just what the orchard man has been looking for.

**Bradshaw.** A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. As regards productivity it is unequalled by any plum we have ever fruited. Heavy thinning produces the finest fruit. Middle of August.
Coe's Golden Drop. Very large, light yellow often dotted with red in the sun; an excellent late sort. Last of September.

Diamond. A large magnificent plum, color a dark purple, with a beautiful bloom. Tree hardy and productive. September.

Fellemberg Prune. A fine prune, oval; purple; flesh juicy and delicious; parts from the stone; fine for drying; tree very productive. Early Sept.

German Prune. Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. September. Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune. Early Sept.

Grand Duke. One of the best late plums for market, as large as Bradshaw, of same color, entirely free from rot. Last of September.

General Hand. A very large plum, roundish; color, deep yellow; flesh juicy. September.

Gueii. This is one of the newer varieties originating in New York state. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. September.

Green Gage. Flesh pale green, melting, juicy, exceedingly sweet and rich and unequalled. August 16th.

Hungarian Prune. (Pond's Seedling.) Very large dark red, juicy and very sweet. Sept.

Imperial Gage. Rather large, oval; greenish; flesh juicy, rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best of plums. Middle of August.

Lombard. Has always been a great favorite with plum growers. The tree adapts itself to all localities and it is very productive and extremely hardy. Aug.

Moore's Arctic. Valuable for its productiveness and extreme hardiness. Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardiest plum he has tested. September.

Niagara. Red, large size, making an attractive appearance in market, and possesses good shipping qualities. Aug.

Reine Claude. (Bayard's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. September.

Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketeer. Sept.

Shropshire Damson. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color. October.

Thanksgiving Prune. Very productive, good quality and long keeper. It will keep for weeks and months after picking like an apple. October.

York State Prune. One of the largest. Very best in quality and most productive of all prunes; large size, color dark blue, covered with purple black, delicious. Is being planted extensively and is considered the best for commercial purposes. Last of August.

Japan Plums

Burbank. Is decidedly the best of Japan varieties. Fruit large, oval, with a reddish purple skin; flesh yellow, juicy and good. August.

Red June. The great early market Plum. Medium to large; deep vermilion red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. Early Aug.

Wickson. This, largest of the Japan Plums is superb in every way. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet. Sept.

Perkiomenville, Pa., April 10, 1915.

Gentlemen:—

Received the trees and vines, and must say they are beauties. They arrived in excellent condition, and your packing was nicely arranged. Yours truly.

**For the Convenience of Our Customers,** we have printed in heavy type the names of the best and most profitable varieties.

**Peach Growing is Today a Great Industry,** in all probability more peaches are being planted annually than any other fruit. The comparative ease with which Peach trees may be cultivated, their freedom from disease, the short period before they come into bearing, together with the wonderful demand for the fruit, and the facility with which it may be shipped to markets, make peach growing extremely profitable.

**Here is the Important Question that Confronts Every Planter:** Where are the peaches that you buy propagated? On some low land that will throw up a big, soft, spongy tree that will freeze out the first cold winter and just when you ought to have a good crop you find your fruit buds are killed? Or are they raised on the upland where they make a strong, hardy, healthy, vigorous growth?

**Our Peaches** are propagated on the upland at an elevation of 1,500 feet, therefore are absolutely hardy and proof against severe winters. **Our peach pits** are gathered in the mountains of North and South Carolina, where disease is unknown. These two facts prove beyond question of doubt why it is decidedly advantageous to plant Maloney Quality peach trees for best results.

**Soil.** Peach trees will succeed on any kind of rich soil, but will not thrive on clay, nor damp, low land.

**Care of Peach Trees:** To keep your trees in a healthy and vigorous state, that will insure good crops, you must keep your ground clean and mellow by harrowing. An occasional dressing of wood ashes will be very beneficial. Do your pruning in the spring. Cut out all dead and useless wood, thereby letting in the necessary light and air to give the fruit color.

Atlanta, Ga.

Gentlemen:—Those Elberta peaches you shipped me bore a full crop this fall of the finest fruit I ever saw. Yours respectfully,

M. E. Rice.

Belle of Georgia. Very large white Peach with red cheek. The flesh is white, firm and of fine flavor. Tree rapid grower and very productive. July. Free.

Carman. Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; very hardy and productive every year. Aug. Free.

Crawford's Late. Fruit of large size; skin yellow, or greenish yellow, with dull red cheek; flesh yellow; tree vigorous, moderately productive. Last of Sept. Free.

Crawford's Early. A magnificent large, yellow peach, of good quality. Tree vigorous and very productive. Its fine size, beauty and productivity make it one of the most popular sorts; no other variety has been so extensively planted. First of Sept. Free.

Champion. Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; valuable for commercial orchards, extreme hardness and splendid quality make it a favorite. Late Aug. Free.

Chair's Choice. Has no superior in quality and flavor, and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, ripens after Smock; great bearer. Oct. Free.

Elberta. The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is harder in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following quick upon Early Crawford. Early Sept. Free.

Fitzgerald. It is one of the hardest peaches, both in bloom and tree; very prolific, large size. First of Sept. Free.

Greensboro. A valuable variety; color greenish-white, shaded and splashed with dark red, very hardy and not so subject to rot as are most early varieties. Owing to extreme hardiness of both tree and bud we recommend it for sections where other varieties do not succeed. Late July. Free.

Hill's Chili. Fruit medium size, oblong; skin yellow, shaded with dark red; flesh yellow; very rich and sweet. First of Sept.

Hiley. An exceedingly handsome creamy white peach of large size, with a delightful red cheek; flesh is white, tender and juicy; commercially proving one of the most profitable. Early July. Free.

Mountain Rose. Large, red, white flesh, juicy and excellent. Early August. Free.

Niagara. Tree hardy, healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. Last of Aug.

Salway. Large roundish ovate; yellow, with a crimson cheek; flesh deep yellow, red at the pit; sweet, juicy, good. Late. Valued as one of the best late peaches for market. Oct. Free.

Smock Free (Beers Smock). Fruit large; oval; skin orange yellow, mottled with red; a good market sort. Last of Sept.

Yellow St. John. Of medium size, orange yellow with a red blush on sunny side; flesh tender, juicy and quality very good. Tree a strong grower and bears heavy crops every season. Aug. 15th.
Dwarf Fruit Trees

Dwarf fruit trees bear larger, better fruit, bear several years earlier, and produce more returns for a given space than standard trees. This is all true and there are even more important points. The low, broad heads are within reach, so that apples or pears can be easily picked. You can plant dwarf trees in your garden and still grow strawberries and most vegetables. With dwarfs some varieties will bear the first year, all will the second year and bear a full crop the fourth year.

All Dwarf Apple trees are budded on Paradise or Doucin stocks. They will succeed in many places where standard trees fail. In a word, they are the kind of Dwarf trees that will put their strength into fruit instead of wood. To insure best selection of varieties order at once since our supply is limited.

Quince Trees

Orange. The best of the older varieties, still more extensively cultivated than any other. Every one is acquainted with the Orange quince, a good old variety that never disappoints the planter; good for home use and for market. Its large golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every garden or orchard every season, as it rarely fails to produce a crop. Ripens in Oct.

Meech’s Prolific. Fruit is large, orange yellow, of great beauty and delightful fragrance. Tree a vigorous grower and immensely productive. Ripens between the Orange and Champion. Last of Oct.

Champion. A large, late-ripening sort, that produces good and constant crops. One of the best for sections not subject to early frosts. Last of Oct.

5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, and 3% discount after that date.

Russian Apricots

Beautiful and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian varieties are quite distinct from the other European sorts; much harder, earlier bearers and productive.

Alexander. Very hardy and immense bearer; fruit large; yellow, flecked with red; very beautiful, sweet and delicious. July.

Alexis. Very hardy and abundant bearer; yellow with red cheek; large to very large; slightly acid, rich and luscious. July.

Moorpark. One of the largest. Orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

Nut Trees

American Sweet Chestnut is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as $14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. $6.00 to $10.00 per bushel is the common price. A well grown American Chestnut that has passed the quarter-century mark is a gracious delight to the eye of the lover of trees, and there is a peaceful, dignified impressiveness about a grove of old chestnut trees that is good to experience.

Price, 4 to 5 feet, 50 cents each, 10 for $4.50.

Chestnut, Spanish. A handsome round-headed tree, producing abundantly, very large nuts that find a ready market at good prices.

Prices of Spanish Chestnut Trees, 4 to 5 feet, 50 cents each, 10 for $4.00.

English Walnut. A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. They are fairly hardy and are fruiting here in the Genesee Valley.

Price, 3 to 4 feet, 50 cents each, 10 for $4.50.

Black Walnut. The common well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are liked by many.

Price, 4 to 5 feet, 50 cents each, 10 for $4.00.

Butternut. A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel.

Price of Butternut trees, 4 to 5 feet, 50 cents each, 10 for $4.00.

We will send strong trees of Apricots and Nut trees by Parcels post for 3c per tree extra.
### Bargains in Fruit Trees

#### Smaller Size

Some buyers of trees have an idea that nothing but the largest size trees are fit to plant, that all other sizes are poor trees. This is a mistake, as some of the best orchards are grown from the smaller size trees. Our four to five foot trees are not third class, but first class of their size, and while we do not recommend the small planter, or one who plants but a few trees, to select these for his planting, we do recommend the medium and small trees to the orchardist. We have an especially nice lot of peaches, apples, pears, cherries and plums at special prices.

</table>

**PARCEL POST.** Currants can be sent by parcel post, postage prepaid, for two cents per bush extra. 5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, and 3% discount after that date.

Plant in rows 6 feet apart and 4 feet apart in the rows, or if to be cultivated both ways, 5 feet apart each way. Before planting, the roots should be shortened to 10 or 12 inches, and in planting care should be taken to firm the earth about the roots. After planting, cut back the tops about one-half the previous year’s growth. No plant will better repay generous treatment and high cultivation than the currant. Two or three forkfuls of good stable manure around each bush every fall is desirable.

For the benefit of the amateur fruit grower, we have set in heavy type and underscored such varieties as should be considered when making selections for commercial planting.

**Black Champion.** Bush vigorous, and productive; fruit averages above medium; pulp nearly sweet, mild flavored. A desirable variety for general culture.

**Cherry.** Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin skinned, juicy and fine-flavored. One of the most productive of the large Currants.

**Fay.** (Fay’s Prolific). Bush vigorous but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker; and berry averages large; juicy and less acid than Cherry. An excellent commercial variety.

**Perfection.** In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries are maintained to the end of the bunch. It is one of the most productive Currants we have ever known; quality is superior to anything in the market, being of a rich, mild, sub-acid flavor and having plenty of pulp with few seeds.

Wholesale Price of Perfection, 2 yr., 15 cents each, $1.00 per 10, $9.00 per 100, $75.00 per 1000.

**Red Cross.** A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

**Wilder.** (President Wilder). Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late. Because of its exceedingly vigorous growth, great productiveness, high quality and remaining good so long after ripening, we recommend this as one of the best red currants, both for table and market.

---

**Home Garden Collection of Currants**

10 Bushes, 2 year old, for 60 cts.

2 Perfection
3 Red Dutch
3 Fay’s Prolific
2 Black Champion

---

**White Grape.** Bush vigorous, somewhat spreading, productive; clusters long; berries large to very large, averaging large; of very attractive color, mild flavor and good quality. A good table variety.

*Every city and country garden* should have a dozen or more grape vines. They do admirably trained up the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest fruit. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

**Brighton.** Red. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening. One of the very best shippers. Vine hardy and vigorous grower.

**Catawba.** Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

**Concord.** Black. Early. Decidedly the most popular Grape in America and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety. Price 10c each, 75c per 10, $4.00 per 100.

**Campbell’s Early Black.** Strong grower, with large, healthy foliage, productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore’s Early. Bunch and berry large, glossy black with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality.

**Delaware.** Red. Bunches small, compact, shouldered; berries rather small, round, skin thin, light red; flesh very juicy, sweet, spicy and delicious.

**McKinley Early** (New White). Strong grower; bunches large, compact and handsome, berries large and oval like Malaga Grape. First, turning to yellow when fully ripe; very sweet. Extra quality; a good shipper; remarkable keeper; will hang on vines sound and perfect for weeks after ripe. Ten days earlier than Niagara with the richest flavor of any Grape on the market.

**Moore’s Early Black.** Bunch large, berry large round with heavy bloom vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south.

**Niagara White.** Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

**Worden.** Black. Bunch large, sometimes shouldered, compact; berries very large, skin thin.

**Grape Vines at a Bargain**

12 Strong 2 Year Vines for 75 Cents

- 4 Concord, 1 Brighton, 2 Delaware
- 3 Niagara, 2 Worden

All 2 year old, first class Grape Vines for 75 cents, regular price being $1.80.

23
Blackberries
Wholesale Price of Strong Plants Best Selected Varieties
50c per 10 $2.50 per 100 $17.50 per 1000
5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% discount after that date.

Blower's. Claimed to be the hardiest, most productive, of finest quality and to bring the highest market price.

Eldorado. The vines are very hardy and vigorous, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

Mersereau. Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra size berries, which are brilliant black and retain color; extra quality; sweet, rich and melting, without core. Ripens very early.

Snyder. Extremely hardy, enormously productive; medium size, no hard, sour core; sweet and juicy. Ripens early.

Raspberries
Wholesale Price of Strong Plants Best Selected Varieties
10 for 35c 100 for $1.75 1000 for $12.50

Cumberland New Black. This berry with its greatly superior size combines the equally valuable characteristics of great firmness, splendid quality and wonderful productivity. The plants are entirely hardy, very vigorous and healthy.

Cuthbert Red. Large, productive, attractive. It yields bountifully of large and beautiful bright red berries, which are easily picked and command good prices.

Kansas Black. Is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early.

Plum Farmer Black. This very large and productive black raspberry has been thoroughly tested in western New York where it is a great favorite for market or home use. Ripens early and quickly.

Marlboro (Red). A very profitable, early market variety with large, light crimson fruits, of good size and flavor. The crop covers a period of four or five weeks in ripening.

Gooseberries
Downing. Is the largest and best of all native American varieties. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew.

Red Jacket. An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper.

Price for all varieties of Gooseberries named above, strong 2 year bushes, 15 cents each, 10 for $1.20, 100 for $8.50.

Price 50c for 10, $1.00 for 25, $2.25 per 100, $15.00 per 1000.

PARCEL POST. Any variety offered on this page can be sent by Parcel Post postage prepaid for 2c per bushel extra.
Why the Agent cannot Compete
With the Catalog House

A few facts which we want you to consider. The agent states that if you buy from the catalog house at a lower price than he asks, you will receive inferior stock.

The truth of the matter is, it is impossible for him to sell you trees or plants at our prices, for he represents some retail house which buys from the grower, who must make a profit. This we will term profit No. 1. The retail house he sells for must have a profit, which is profit No. 2. Then the agent who has big traveling expenses must get a price high enough to cover his expenses, as well as his commission, which is profit No. 3. Therefore the tree which we, the growers sell to you at wholesale plus one small profit is sold by the agent with three profits, consequently the same tree which we sell for 30c the agent must sell for 75c to $1.00.

You can readily see it is not the difference in quality that causes the difference in price, but it is due to his extravagant system as compared with our improved method of selling direct to the consumer, thus eliminating two profits.

While it may be unfortunate for the agent that the mail order houses are capturing the bulk of the business, we believe the general public should be taken into consideration. You would not today cut a field of wheat with a scythe or cradle as did our forefathers for you would find it too expensive. The agents system of selling was inaugurated way back in those days. What satisfied our grandfathers, does not satisfy us, as the intelligent American is buying the most economical way.

We believe the majority of agents honestly try to give their customers a reasonable a price as they can, but the fact that their trees must pass through so many hands before they reach the consumer puts them in a position where they positively cannot compete with the catalog house, which sells direct to the consumer without the expense of traveling salesmen or middlemen.

Do You Wonder Why the Agent is Antagonistic to the Mail Order House

Garden Roots

PARCEL POST. Garden Roots can be sent by parcel post, postage prepaid, for one cent each extra.

Rhubarb or Pie Plant

Linnaeus. Large, early, tender and fine. The very best of all.
10 cents each, 75 cents per 10, $5.00 per 100.

Asparagus

50c for 25, $1.00 per 100, $6.50 per 100.
To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth. Give the bed a dressing of manure and except near the seashore three pounds of salt early every spring.

Do not cut for use until the plants have grown two seasons.

Palmetto. A very early variety, even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

Conover's Colossal. Very large, makes rapid growth; planted mostly by market-gardeners; very productive.

HOLT'S MAMMOTH SAGE. Plants of strong growth. Leaves large, borne well above the ground. Of strong flavor and superior quality.

Price of strong 2 year roots, 10 cents each, 10 for 75 cents.

HORSE RADISH. Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre.

Price: Strong Sets, 25 cents per 10, $1.00 per 100, $8.00 per 1000.

5% discount on all cash orders amounting to $4.00 and up received before Oct. 15, 3% after that date.

- **Blanche Roberts.** Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.
- **Bessie Brown.** New. Very large, shell-shaped petals of creamy white, faintly flushed with pink, make up into flowers of rare beauty.
- **Baby Rambler.** A dwarf (bush). Just the thing for beds and borders and for edging walks.
- **Coquette des Aps.** White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.
- **Frau Karl Druschki.** Snow Queen. The finest white Hybrid Perpetual Rose, with large, full flowers of splendid form. It is marvelous in its beauty in half opened bud and in the pure white of the fully opened bloom.
- **General Jacqueminot.** Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.
- **Killarney.** One of the most popular of our garden roses. It is perfectly hardy, a robust grower; color sparkling, brilliant, imperial pink.
- **La France.** Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.
- **Magnia Charta.** Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.
- **Mad. Caroline Testout.** One of the most popular of the Hybrid Teas for the garden. This is the rose which has made Portland, Oregon, famous. The flowers are extra large, and of a brilliant, shining pink.
- **Marshall P. Wilder.** Bright cherry carmine, very fragrant and one of the finest bloomers, vigorous.
- **Perle des Jardines.** A rich shade of yellow, fragrant—one of the best yellow roses, bush exceptionally hardy.
- **Prince Camile de Rohan.** Very dark velvety crimson, changing to intense maroon.
- **Paul Neyron.** The largest of all. Deep rose color. A free bloomer and vigorous grower.

**Climbing Roses**

- **Crimson Rambler.** New. Of Japan origin. Very vigorous, growing eight to ten feet a season after it is well established. Entirely hardy and extremely prolific. It blooms in clusters. Of a beautiful crimson color and lasts a long time. It is a jewel.
- **Baltimore Belle.** Pale blush, nearly white. Bloom in clusters.
- **Dorothy Perkins.** A most beautiful shell-pink rambler. In hardiness, nothing more could be desired. Flowers are very double of large size, usually two inches across and borne in loose clusters.

**Rose Collection No. 16**

1 Magna Charta, pink 2 Paul Neyron, red
2 Blanche Roberts, white

5 Strong 2 year Bushes worth $1.25 for 98c
Hardy Flowering Shrubs

Wholesale Price  Large Size  2 Year  2 to 3 Feet  EACH  TEN

PARCEL POST. Shrubs can be sent by parcel post, postage prepaid, for 3 cents per bush extra.

5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% discount after that date.

Shrubs are useful in bringing out the full beauty of a house. Splendid effects can be had by planting an assortment of flowering shrubs on the lawn, not at all difficult to arrange them, for a group planted promiscuously here and there, has a splendid effect, and at our wholesale prices, enables you to improve the home at a very reasonable price.

Althea. A large shrub, sometimes trimmed into tree form, that blooms freely in August or September, when almost every tree is out of bloom. Vigorous grower and succeeds everywhere. Also called Rose of Sharon. We can furnish double varieties in these colors: Althea Double Purple, Red, Pink and White.

Deutzia, Crenata, Double-Flowering. A hardy, vigorous shrub that does not suffer from insects or diseases and early in the season is fairly covered with very showy double white flowers that on the edge are slightly tinged with rose. Handsome, desirable shrub.

Deutzia, Lemoinei. Dwarf, the flowers are large, pure white and produced freely.

Deutzia, Pride of Rochester. Blooms in May. Double, white, tinted with rose on the edge.

Fringe Purple or Smoke Tree. A very elegant and ornamental large shrub, with curious, hair-like flowers of a pinkish brown color which sometimes literally cover the tree and remain all summer.

Barberry Common. Clusters of red berries.
Barberry Purple. Similar to Common Barberry only that the foliage is purple.
Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall.

Calycanthus. (Sweet-scented shrub). The wood is fragrant; foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor.
Deutzia, Gracilis. Pure white flowers in June. Two feet high when fully grown.
Fringe White. A popular and much admired shrub of moderate growth, and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers.

Forsythia Fortunei (Golden Bells). Deep yellow flowers in great profusion in April.

Golden-Leaved Elder. The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Hydrangea, Paniculata Grandiflora. Absolutely hardy; thrives in all soils; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses often more than a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. Wherever known it is considered to be one of the finest flowering shrubs.

Lilac, Purple. An old favorite; purple flowers.

Lilac, White. A well known favorite.

Mock Orange. Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Perennial Phlox. Hardy and succeeds in any climate. Can be planted in large groups on the lawn or in a row along the border of the roadway. Red, pink, or white.

Spiraea, Billardi. A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. A distinctive and beautiful flower and shrub.

Spiraea Callosa Rosea. Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine.

Spiraea Douglasii. Has spikes of beautiful, deep rose-colored flowers in July and Aug.

Spiraea Van Houttei. This is undoubtedly the best of the spiraeas. The cut shown is a fair one and shows it in full blossom. The blossoms are white. Do not pass it by.

Maloney’s Flowering Shrub Collection No. 4

FOR THE HOME GROUNDS

10 Hardy Shrubs, Worth $2.50, for $1.75

1 White Fringe, 1 Forsythia, 1 Syringa, golden, 1 Snowball, common, 1 Mock Orange, 2 Hydrangea, 1 Spirea Van Houttei, 1 Weigelia, Rosea, 1 Deutzia, Pride of Rochester.
Syringa, Common.
Large, white flowers; very hardy.

Syringa, Golden.
Large, deep yellow flowers; bush hardy.

Upright Honey Suckle (white.)
Pure white flowers followed by deep red berries that fill the bush till autumn; very attractive.

Upright Honey Suckle (pink.)
Pink flowers which contrast beautifully with the foliage.

Weigela, Candida.
The flowers are of the purest white, blooming in June, and all summer. Hardy.

Weigela Eva Rathke.
With showy, bright red flowers borne freely during the summer.

Weigela, Floribunda.
The flowers are dark crimson, with white stamens somewhat like Fuchsia flowers. It blooms in the spring and in the fall.

Weigela, Rosea.
This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of deep rosy color, and are borne in great profusion.

Tree Hydrangeas
Price 50c each

Tree Hydrangea—Same as Hydrangea P. G. except in tree form, being grafted on a Hydrangea stalk about 2 ft. high. When in full bloom are very attractive.

Ornamental Trees

No home grounds are really complete without some shade and ornamental trees. The shade of Maples and the dark covers under Evergreens are never forgotten by people who in childhood, played and lived under the trees. A comparison of a home without shade trees about it, to one with, is the best argument we can advance.

**American Elm.** A natural spreading and drooping tree of our own American meadows and forests. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world.

**Wholesale Price, 8 to 10 feet, 75 cents each, 10 for $6.50, 6 to 8 feet, 50 cents each 10 for $4.50.**

**Magnolia, Speciosa**—Flowers smaller, lighter in color than Soulangeana and remain on the tree longer than any other variety. 4-5 ft. $2.00 each.

**Magnolia, Soulangeana**—Chinese variety, dwarf grower, bears snowy white and purple flowers, cup-shaped, and three to five inches in diameter. 4-5 ft. $2.00 each.

**CUT-LEAVED WEEPING BIRCH**

**TEA'S WEEPING MULBERRY**

**AMERICAN ELM**

*This is the most popular shade tree for planting along rural highways*
Ornamental Trees (Continued)

**Catalpa Bungei.** (Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped. A very desirable ornamental.

**Wholesale Price of Trees, 6 to 8 feet, $1.00 each.**

**Catalpa Speciosa.** One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possesses wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers.

**Wholesale Price for first class trees, 6 to 8 feet, 40 cents each, 10 for $3.50.**

**Cut-Leaved Weeping Birch.** This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

**Wholesale Price of Cut-Leaved Weeping Birch, 5 to 6 feet trees, $1.00 each.**

**Horse Chestnut, White Flowering.** The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

**Wholesale Price, 6 to 8 feet, 75 cents each, 10 for $6.50.**

**Maple, Ash-Leaved.** (Box Elder). A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy desirable for street planting and succeeds in many sections where other varieties do not thrive.

**Wholesale Price 8 to 10 feet, 75 cents each, 10 for $6.50; 6 to 8 feet, 60 cents each, 10 for $5.00.**

**Maple, Norway.** This is one of the hardest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

**Wholesale Price 8 to 10 feet, 75 cents each; 10 for $6.50; 6 to 8 feet, 60 cents each, 10 for $5.00.**

---

**LARGE FLOWERING CATALPA SPECIOSA**

**Beech, Purple Leaf.** The blood-leaved tree possesses all the qualifications of an ordinary beech and, in addition has beautiful red leaves. Will retain its foliage during the winter and will add greatly to the appearance of your lawn.

**Wholesale Price of Purple Beech trees, 2 to 3 feet high, 75 cents each.**
Ornamental Trees (Continued)

Maple, Silver Leaved or Soft. Foliage bright green above and silvery underneath. An exceedingly rapid grower. Makes a large tree. A very satisfactory tree to plant in large quantities.

Wholesale Price of Silver Leaved Maple, 8 to 10 feet, 60 cents each, 10 for $5.00; 6 to 8 feet, 50 cents each, 10 for $4.00.

Maple Sugar or Rock. This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived.

Wholesale Price 8 to 10 feet, 75 cents each, 10 for $6.50; 6 to 8 feet, 60 cents each, 10 for $5.00.

Maple, Wier’s Cut-Leaved. One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut-leaved birch.

Wholesale Price 8 to 10 feet, 75 cents each; 10 for $7.00; 6 to 8 feet, 60 cents each, 10 for $5.00.

Mulberry, Downing. This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. This should be in every yard or garden.

Wholesale Price, 4 to 5 feet, 50 cents each, $4.50 per 10.

Mulberry, Russian. Very hardy, vigorous grower, very productive, fruit black and of medium size.

Wholesale Price, 5 to 7 feet, 35 cents each, 10 for $3.00.

Mulberry, Tea’s Weeping. The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground.

Wholesale Price, 5 feet, $1.25 each.

Poplar, Carolina. This tree takes front rank among the best of the poplars. It is one of the most rapid growers among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. It is very desirable when planted at the roadside, in parks or along rivers and streams. It has an advantage over other shade trees because it will grow in any kind of soil.

Wholesale Bargain Prices for Carolina Poplars:
- 10 to 12 feet high, 35 cents each, 10 for $3.00, 100 for $20.00.
- 8 to 10 feet high, 30 cents each, 10 for $2.50, 100 for $17.00.
- 6 to 8 feet high, 25 cents each, 10 for $2.00, 100 for $15.00.

Poplar, Lombardy. A well known variety from its tall spire-like form. Where it is desired to mark a boundary line, or where there is an entrance to a driveway these trees are very effective. We have some beautiful specimens and can recommend them highly. They transplant safely, grow quickly and for many purposes are attractive and desirable.

Wholesale Price, 8 to 10 feet, 40 cents each, $3.50 per 10, $32.00 per 100.

Thorn, Double Pink. Double pink or rose flowers, with white tips.

Wholesale Price for first class Trees, 4 to 5 feet, 75 cents each.

Thorn, Paul’s Double Scarlet. Flowers deep crimson, with scarlet shade; very double.

Wholesale Price of Trees, 4 to 5 feet, 75 cents each.

Thorn, Double White. Small, double daisy-like flowers in clusters.

Wholesale Price for first class Trees, 4 to 5 feet, 75 cents each.

Willow Babylonica. Our common well-known weeping variety; forms a large round-headed, graceful tree; requires plenty of room, and where space can be spared, is quite desirable.

Wholesale Price, 7 to 8 feet, 75 cents each.

WIER’S CUT-LEAF MAPLE

CAROLINA POPLAR
Dear Friend:

One of the greatest pleasures of this business is giving a friend our catalogue, for we know you will find it a big saving in dealing the Maloney way—Direct from Nursery to Planter.

We also know that the 200,000 people who receive our catalogue twice a year will be surprised to see the great reduction in prices of fruit trees, which we are specializing on this fall.

Don't forget that our trees are propagated at an elevation of 1500 feet, therefore are hardy, healthy and vigorous. This year's crop measures up to our expectations in every sense of the word and will satisfy you, for you know Maloney Trees are backed by a binding guarantee—no risk—no chances—you are entitled to what you buy—we want it—You get it when dealing with Maloney Bros. & Wells Co., New York State's Largest Nurseries.

Plant Maloney Trees and share the fruit growers profits. Look about you and see what your fruit growing friends are doing—building good houses, running fine autos and building up large bank accounts. You can do it too. The plan is a simple, common sense one. Just plant more Apples, Peaches, etc. Here is what an acre of land will do for you. The average yield per acre of an Apple orchard is $750.00; Pear $625.00; Sour Cherry $1536.00, etc., and yet you wonder why the fruit grower is getting ahead so rapidly. Compare these returns with what you are getting from farm products. That will tell the story.

Put a few dollars into shrubs and ornamentals for planting around the home.

We know Maloney Stock will please. If it does not come up to specifications, return same to us at our expense and we will refund your money.

We await your order with much pleasure.

Yours cordially,

WJM : ML

Dansville's Pioneer Wholesale Nurseries
Hedge Plants

**California Privet.** A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The leaves are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. Should be planted about eight to ten inches apart to give best results.

*Strong plants, well branched, 18 to 24 inches, 10 cents each, 65 cents per 10, $3.50 per 100, $30.00 per 1000.*

*Strong plants, well branched, 2 to 3 feet, 15 cents each, 65 cents per 10, $4.50 per 100, $40.00 per 1000.*

**Barberry Thumbergii.** A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. All Barberries make very fine hedges.

*Strong plants, 18 to 24 inches, well branched, 25 cents each, $2.00 per 10, $12.50 per 100.*

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. For Hedge purposes Norway Spruce should be planted in single rows 2 feet apart.

*Wholesale price, 2 to 3 feet trees, 30 cents each, $2.50 per 10, $20.00 per hundred.*

**Evergreens**

American Arbor Vitae. A beautiful native tree much used for hedges, screens, singly on lawns and in tubs for porches.

*Wholesale price, 2 to 3 feet, 50c each.*

Colorado Blue Spruce. Foliage is blue and sage—that distinctive color which is so rare in the east. Its silver foliage glistening in the sunlight, makes it surpass in beauty any other evergreen.

*Wholesale price, 2 to 3 feet, $1.50 each.*

Irish Juniper. Junipers are handsome evergreens, always neat and clean. This variety grows exceptionally slim and common-like. A general favorite for cemeteries and other planting.

*Wholesale price, 2 to 3 feet, 75c each.*

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planting without any particular order.

*Wholesale price, 2 to 3 feet thirty trees, 30 cents each, $2.50 per 10, $20.00 per hundred.*

Koster's Select Blue Spruce (Grafted)—The finest of all blue evergreens, selection from the Colorado Blue, of extra fine color and compact free growth. Very dense on branch ends like all spruces and has regular slim branches, all growing to the same length in the same form.

*Price, 2 to 3 feet, $2.50 each.*

Hardy Climbing Vines

**Ampelopsis Veitchi** (Boston Ivy.) This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving it the appearance of being shingled with green leaves.

*Wholesale price of strong 2 year plants, 35 cents each.*

**Clematis Henryi.** A vigorous grower and a free bloomer, producing its large pure white flowers constantly during the summer and early autumn. The best large-flowered variety.

*Wholesale price of strong 2 year plants, 35 cents each.*

**Clematis Jackmannii.** The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom. This is the best known Clematis, and should have credit of the great popularity now attending this family of beautiful climbers.

*Wholesale price of strong 2 year plants, 35 cents each.*

**Clematis Paniculata** (Sweet-scented Japan Clematis.) Of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy foliage. The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.

*Wholesale price of strong 2 year plants, 25 cents each.*

**Dutchman's Pipe.** Brownish flowers, resembling a miniature pipe; splendid for archways or verandas.

*Wholesale price of strong 2 year plants, 50 cents each.*

**Halleana** (Hall's Japan Honeysuckle.) An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.

*Wholesale price of strong 2 year plants, 25 cents each.*

**Wisteria, Chinese Purple.** A most beautiful climber of rapid growth and producing long pendulous clusters of pale blue flowers.

*Wholesale price of strong 2 year plants, 35 cents each, 10 for $2.50.*

5% discount on all cash orders amounting to $4.00 and up received before Oct. 15th, 3% discount after that date.
